## Empowering small growers, their communities and manufacturers alike

EarthOil by Univar Solutions is a rare supplier in the world of natural ingredients for the Beauty & Personal Care industry. We can help you create products with a distinctive advantage using established and unique oils from around the world.

### Come on a journey with EarthOil

EarthOil shows expertise in the length of the supply chain, from mutually beneficial relationships with our growing partners to freight and distribution, including oil analysis and market knowledge.

We offer sustainable, organic ingredient solutions on a global scale to affordably provide the ethically-sourced products today's consumers seek.

### Fairness and safe conditions for sustainable change

Today's consumers demand that more and more raw ingredients come from fairly traded sources and expect more information about the products they buy - where they are sourced, how the producers are treated, whether they receive a fair price, and what impact the production of goods has on the environment and the local community.

Since 2009 EarthOil has shown its commitment to a guiding set of principles through Fair For Life (FFL) certification by Ecocert. Discover our fair trade certified oils and create a difference.

Our offering contains 100% Pure and Natural:

- Essential Oils
- Vegetable Oils
- Hydrosols and Floral Waters

## Pure Australian Ingredients

At Univar Solutions, we are proudly partnering with Down Under Enterprises to offer you the best of Australia.

Down Under is a family owned and operated grower and distributor of Australian essential oils. They were founded in 2001 to distribute wholesale bulk Australian Tea Tree Oil from their family farms. Known provenance assures customers of a reliable and sustainable supply with highly consistent quality and aroma. Over the years, Down Under has become one of the largest suppliers of 100% Pure Australian Tea Tree Oil to the United States and Asia, and now with Univar Solutions to Europe.

Down Under offers 100% pure and natural products that are 100% sustainable and fully traceable back to the grower. Quality, traceability, and sustainability have always been at the heart of Down Under's philosophy. You can be assured you're getting the very best native Australian ingredients.

## Hydrosols and Floral Waters

Hydrosols are naturally produced during the steam distillation of essential oils. They are considered a by-product of the process and would otherwise be waste material. As their name suggests, hydrosols are the saturated solutions of the plant's water soluble components. They exhibit the same olfactory character as the oils, yet in a milder format.

Floral waters do not come from the distillation process, but are essential oils diluted in water. Both hydrosols and floral waters deliver delicately fragranced ingredients to achieve high 'natural content' formulations for personal care products.
