### Univar Solutions

## Clean water is our common goal

But getting water clean enough is a complex process that requires the right set of chemicals to remove unwanted contaminants.

At Univar Solutions, we know what challenges we are facing in terms of the world's water supply. Chemicals for water treatment therefore plays a crucial role when it comes to improving the results and the processes that exist today.

Univar Solutions offers a wide portfolio filled with functional ingredients and products for different types of water purification. Proudly we represent several of the world's leading chemical manufacturers. We combine outstanding technical expertise in chemical distribution with reliable service and well-planned logistics.

We value strong and honest collaboration with our customers so that we together can find the solution that suits you best. This list gives a clear overview of the water treatment chemicals we have today.
