Technology

SOFTIGEN® PURA

A multifunctional emollient made from 100% vegetable origin with excellent skin smoothing properties, providing a soft and velvety feel to the skin. Having very similar properties, it is an effective substitute for conventional petrolatum and suitable for all kinds of cosmetic formulations.

MIGLYOL® Gel B

An emollient-based gel used as a consistency regulator due to its high thermal stability, making it excellent for maintaining viscosity over a wide temperature range. Suitable for water-in-oil emulsions and anhydrous stick formulations, this oleo ingredient remains easy to spread, prevents color bleed and delivers a soft and velvety after feel.

SOFTISAN® 649

Excellent multifunctional film former that improves the skin barrier along with its water resistance. Even at low usage levels, this product has proven to reduce trans-epidermal water loss with long lasting effects in colour cosmetic stick applications. A vegan replacement for lanolin, it readily performs as a skin smoothing agent.

DYNASAN® 118

Improves the solidification process by accelerating crystallization in stick formulations. It can be readily used in skin care emulsions as a consistency regulator and for enhancing skin texture. Recommended as an alternative solution for beeswax.

SunPURO® Bronze (C84-6288)

SunPURO® oxides carry the most stringent heavy metal specifications available in the market today. SunPURO® oxides surpass all active global regulations, providing formulators with the highest level of quality assurance.

Lip Balm

TRADE NAME	INCI	SUPPLIER	%
PHASE A			
SOFTIGEN®PURA	Olus Oil (EU) / Vegetable Oil (US)	IOI Oleochemical / Univar Solutions	41.80
MIGLYOL® Gel B	Caprylic/Capric Triglyceride, Stearalkonium Hectorite, Propylene Carbonate	IOI Oleochemical / Univar Solutions	20.00
Cocoa Butter	Theobroma Cacao Seed Butter	EarthOil by Univar Solutions	4.00
IMWITOR® PG3 DIS	Polyglyceryl-3-Diisostearate	IOI Oleochemical / Univar Solutions	1.00
Sweet Almond Oil	Prunus Amygdalus Dulcis [Sweet Almond Oil]	EarthOil by Univar Solutions	1.00
SOFTISAN® 649	Bis-Diglyceryl Polyacyladipate-2	IOI Oleochemical / Univar Solutions	15.00
DYNASAN® 118	Tristearin	IOI Oleochemical / Univar Solutions	3.00
SOFTISAN® 100	Hydrogenated Coco-Glycerides	IOI Oleochemical / Univar Solutions	3.00
Candelilla Wax Substitute 1682	Candelilla Wax	Strahl & Pitsch / Univar Solutions	5.00
White Ozokerite Wax 77W	Ozokerite Wax	Strahl & Pitsch / Univar Solutions	2.50
Behenyl Alcohol	Behenyl Alcohol		3.00
PHASE B			
d- α -Tocopheryl Acetate	Tocopheryl acetate	DSM / Univar Solutions	0.50
SunPURO® Bronze (C84-6288)	Iron Oxides , Mica	Sun Chemical / Univar Solutions	0.20
Total:			100.00

PROCEDURE

1. Melt phase A up to 80-85°C while stirring.
2. Add ingredients of phase B and stir until a homogenous creamy liquid has formed.
3. Pour while hot into packaging and let cool.
