

Lock-It In Primer and Setting Spray

Lock-It in primer and setting spray has an irresistible formula with a luxurious, soft after feel. This weightless spray keeps your makeup looking fresh and vibrant all day long. It is powerful enough to lock-in looks yet light enough to wear all day, every day. It feels totally undetectable on the skin, with no tightness or sticky residue.

FEATURE INGREDIENTS

DOWSIL™ HMW 2220 Non Ionic Emulsion

A small particle size emulsion of an extremely high viscosity polymer. Ease of formulation/cold processing. Compatible with non-ionic, cationic and anionic surfactants systems. Imparts rich feel to skin care formulations. Wash-off resistance. Film barrier properties. Viscosity builder for water-in silicone systems.

DOWSIL™ FA 4103 Silicone Acrylate Emulsion

A 30% acrylates/polytrimethylsiloxy-methacrylate copolymer anionic emulsion. This is a water dispersible emulsion ready to use with ease. It can be used in all emulsion types. It offers a film that is flexible, water and sebum repellent and resistant to abrasion.

DOWSIL™ EP 9801 Hydro Cosmetic Powder

Has enhanced sensory and functional performance. It combines the sensory benefits and functionality of an elastomer powder with the ability to be dispersed into water. Benefits include sebum absorption, stability in low viscosity systems, optical effects, and soft focus features.

PROCEDURE

Phase A

Premix phase A until homogeneous.

Lock-It In Primer and Setting Spray

#	INCI Name	Trade Name	Supplier	Function	Wt.%
Phase A					
1	Aqua	Water	Univar		Q.S.
2	Propylene Glycol	Propylene Glycol	Univar	Humectant	10.0
3	Glycerin	Glycerin USP	P&G/Unviar	Humectant	3.0
4	Divinyldimethicone/Dimethicone Copolymer (and) C12-13 Pareth-3 (and) C12-13 Pareth-23	DOWSIL™ HMW 2220 Non Ionic Emulsion	DOW®/Univar	Skin Feel Enhancer	5.0
