SKIN JELLY

Soothing Toner

Your skin is your most beautiful canvas. Keeping it smooth, protected and toned ensures your makeup routine—whether it's one product or ten—goes on flawlessly. Our Skin Jelly is a deeply hydrating toner that offers gentle yet effective resurfacing and pH balancing benefits, perfect to help prepare your skin for your next work of art. Our thick gel formula means no cotton pads required, less waste.

<p>Performance & Innocuity Multifunctional natural biopolymer blend from Cargill, multifunctional humectant from Oxea, mild preservative from INOLEX, multifunctional safe synthetics from ANGUS & INOLEX</p>	<p>Marketing Short INCI, high performance 100% natural actives from The Art of Natural Solution & Corbion</p>
<p>Sustainability 90% natural and biobased ingredients, biodegradable ingredients from ANGUS, Cargill & Corbion</p>	

Technology

TRIS AMINO® ULTRA PC

Globally compliant buffering agent which is excellent for mild neutralization and emulsion stabilization. Also helps prevent yellow discoloration in translucent products.

Witch Hazel Bark ANB

Due to its high tannin content, witch hazel bark has effective astringency and purifying abilities. It also has anti-wrinkle, anti-oxidant, and skin brightening properties.

Actigum™ VSX 20

Natural, sustainable, synergistic combination of biopolymers, which helps formulators to thicken and stabilize skincare formulations.

Satiagel™ VPC 508

Made from high quality red seaweed polysaccharides, this texturizer is known for its gelling and thickening properties. It is suitable for clear formulations that will be less sticky than carbomers.

Corbion

PURAC® BF P/41

Biobased active ingredient which works to gently, yet efficiently increase skin cell renewal. 100% natural, biobased and biodegradable, Ecocert, COSMOS approved.

Allantoin

Improves the skin's moisture retention providing a smoothing effect, helps to minimize the appearance of aging and skin damage. Effective anti-irritant, protecting the skin.

Spectrastat™ PHL

Multifunctional blend that allows self-preserving formulations including neutral pH, cold processed, and high water content formulations.

1,3 Butylene Glycol

Butylene glycol is a multifunctional molecule used as a humectant, that allows for balanced viscosity and surface tension in wide concentration ranges, without any skin irritation.

SKIN JELLY

Soothing Toner

TRADE NAME	INCI	SUPPLIER	%
PHASE A			
Deionized Water	Water		78.05
PURAC® BF P/41	Potassium Lactate, Aqua, Lactic Acid	Corbion / Univar Solutions	2.00
Witch Hazel Bark ANB	Water, Butylene Glycol, Hamamelis Virginiana (Witch Hazel) Bark/Twig Extract	Art of Natural Solution / Univar Solutions	10.00
Hyaluronic Acid	Sodium Hyaluronate	Contipro / Univar Solutions	0.20
Allantoin	Allantoin	DSM / Univar Solutions	0.50
PHASE B			
1,3 Butylene Glycol	Butylene Glycol	Oxea / Univar Solutions	5.00
Actigum™ VSX 20	Sclerotium gum, Xanthan gum	Cargill / Univar Solutions	0.50
Satiagel™ VPC 508	Carrageenan	Cargill / Univar Solutions	1.00
PHASE C			
TRIS AMINO® ULTRA PC	Tromethamine	Angus / Univar Solutions	0.25
Spectrastat™ PHL	Caprylhydroxamic Acid, 1,2-Hexanediol, Propanediol	Inolex / Univar Solutions	2.50
Total:			100.00

PROCEDURE

1. Phase A - Charge Part A ingredients into main vessel with mixing. Slowly add the Hyaluronic Acid and Allantoin.
2. Phase B - Premix Part B ingredients and add to main vessel. Continue mixing until gums are fully dispersed and hydrated.
3. Phase C - Adjust to pH 7.0 - 7.5 with Tris Amino, then add Spectrastat. Allow 5 mins mixing between additions.

PROPERTIES

pH 7.0 - 7.5
 Viscosity: 30234 cP(S-63, 2.5 rpm, 19.9°C)
