

Dream Big – Transforming Night Mask

Get the natural healthy looking complexion of your dreams! This mask stick contains all the luscious nutritive oils needed to work wonders on your skin as you sleep. Be amazed as this stick transforms into an oil to deeply moisturize and pamper your skin.

BioEstolide™ 1300

Plant-based emollient with enhanced stability properties, exceptional moisturization characteristics, and a light, satiny feel. This unique patented ester is made from natural seed oils and delivers enhanced performance properties for personal care formulations.

Quali®E Vitamin E

Vitamin E is a powerful oil-soluble antioxidant and free-radical scavenger. Vitamin E enhances moisturization and strengthens the skin barrier. It helps counteract the appearance of inflammation linked to oxidative processes through downregulation of its mediators.

SustOleo™ TL

100% Natural emollient that provides unique textures and sensorial properties. It leaves behind a light powdery after-feel.

LexFeel® WOW DT

Plant based emollient that is fast-spreading and partially volatile. It works well as a wetting agent for pigments, and has an exceptional after-feel and anti-whitening properties.

Versastique® Clear ME 5 T

Multi-functional material that provides a better way to formulate through simplified creation of functional and aesthetic applications. With translucent and clear properties, Versastique® is ideal for natural, mineral and synthetic ingredients in cosmetics, personal care, skin care and sun care products.

Versastique® Clear SQ 5 T

Multi-functional material that provides a better way to formulate through simplified creation of functional and aesthetic applications. With translucent and clear properties, Versastique® is ideal for natural, mineral and synthetic ingredients in cosmetics, personal care, skin care and sun care products.

Mackaderm® LIA

Acts as a soft touch emollient with a high spreadability and fast absorption on the skin. It has a 100% vegetable origin and is non-toxic, non-irritating, fully biodegradable and environment friendly. It has a silicone-like sensorial profile and provides a light, non-greasy texture to skin. Also suitable for hair care formulations.

SunCROMA® Ext. D&C Violet 2

Resulting from decades of research, development and applications testing, SunCROMA® has become widely accepted as the color standard for the cosmetics industry. For the best in bright, bold pigments, turn to SunCROMA®.

Low environmental footprint ingredient from DSM, SustOleo™ TL from Inolex is 100% natural, biodegradable and USDA BioPreferred, LexFeel® WOW DT is 100% plant-based and USDA BioPreferred. 100% natural and biodegradable ingredient from Solvay. Sustainable, natural and negative environmental footprint ingredient from Biosynthetic Technologies

High performing synthetic ingredient from DSM

	Fragrance, Lavender Oil	Fragrance	Fragrance	PCCA	0.10%

PROCEDURE (HOT PROCESS)	
1	Combine phase A gels in main vessel. Begin heating to 100 - 110°C. Begin moderate mixing. Once melted, add SustOleo™ TL and mix until melted.
2	Combine phase B ingredients in a separate vessel. Heat to 70-80°C and mix until uniform. Add to phase A, mix and heat until uniform.
3	Remove from heat. Add phase C immediately.
4	Pour into containers (90-100°C) and allow to set on cooling table.

STABILITY
1 month 45°C, 1 month 25°C, and freeze thaw: pass

COMMENTS
• Aspect: clear purple stick
• Specific Gravity: 0.818
• Application: After cleansing, apply a small amount onto the face and neck and massage gently. Leave on overnight
