
Aqueous Silicone Tire Shine

Waterless Silicone Tire Shine is a water based silicone to give that glossy finish to tires without solvent fumes, streaks, or sling.

Xiameter MEM 0349 Emulsion

60% actives non-ionic emulsion formulated with a polydimethylsiloxane that provides gloss.

Xiameter MEM 0037 Emulsion

Anionic, 35% active emulsion based on high viscosity polydimethylsiloxane. It provides a convenient means of applying a film of medium-high-viscosity dimethyl silicone fluid to various other surfaces. Adds shine.

Acusol 820

Acrylic Associative Thickener providing adhesion of the fluid when applied.

Aerosol OT 70 PG

70% active di-2 ethylhexylsodium sulfosuccinate in water and PG. Very good wetting agent and emulsifier.

Mackstat DM

55% solution of DMDM Hydantoin as a very effective broad spectrum antimicrobial protection.
