

Nature's Friend Tire and Rim Cleaner Concentrate

This mildly alkaline cleaner is a safer way to clean tire and rim surfaces without harsh acids, bases or strong solvents. This cleaner leaves a stable foam when applied at 10-20% with a foam applicator and after sitting for a few minutes, is rinsed with a power washer to leave tires and rims clean and untarnished.

Miranol JEM

Sodium mixed C8 amphocarboxylate as a low foam wetting agent.

Miranol FBS

Disodium cocoampho dipropionate for heavy duty detergency.

CLARIANT

Hostacor 2125

Complex carboxylic acid derived corrosion inhibitor for ferrous and non-ferrous water based fluids. Hard water stable, low foaming.

Biopure GLDA

High purity, versatile and readily biodegradable chelant based on L-glutamic acid, a natural and renewable raw material.
